A Letter from the Chair

Dr. Muthukumaran Packirisamy, Department Chair

May 4, 2026

Dear Valued Community Member,
The Concordia Concrete Toboggan Team represents Concordia at the Great Northern Concrete Toboggan Race (GNCTR), the longest-running undergraduate engineering competition in Canada. The competition involves designing and manufacturing a toboggan that includes reinforced concrete skis, a structural frame, a braking system, and a steering system.

Beyond the technical requirements, this initiative fosters project management, budgetary oversight, and interdisciplinary collaboration among the engineering student body. Concordia University's participation in this national competition ensures that our graduates are equipped with practical, industry-standard competencies.

The Gina Cody School of Engineering and Computer Science formally supports the team's pursuit of community partnerships. Support for this project provides the resources needed to maintain Concordia's standing as a leader in Canadian engineering education and to develop technical talent.

We invite your organization to review the attached sponsorship opportunities and consider contributing to the continued success of this design team.

Sincerely,

Muthukumaran Packirisamy Ph.D., P.Eng., FNAI, FRSC, FRSC (UK), FINAE, FEIC, FCAE, FASME, FCSME, FIEI Chair and Professor
Distinguished University Researcher,
Gina Cody Research and Innovation Fellow,
Concordia Research Chair,
Director, Optical-Bio Microsystems Laboratory,
Director, Micro-Nano-Bio Integration Center

Our Mission

Since 2002, our mission has been to represent Concordia University and the Province of Quebec as the sole provincial team competing at the Great Northern Concrete Toboggan Race (GNCTR). We aim to build a multidisciplinary environment where 30+ of our creative and ambitious engineering students connect theoretical design with real-world manufacturing.

GNCTR

The Great Northern Concrete Toboggan Race is the largest and longest-running undergraduate engineering competition in Canada. Each year, more than 500 students from universities across North America gather to compete in a challenge that tests structural design, material science, and safety. The objective is to design a five-person toboggan that safely descends a ski hill at high speed.

The toboggan must include a roll cage for safety and has a unique concrete requirement. The competition stipulates that the only material permitted to come into contact with the snow is reinforced concrete. Concrete is naturally heavy, brittle, and high-friction; teams must think outside the box to engineer high-performance mixes and ski designs.

Team History

2026

- 1st Most Spectacular Run
- 1st Team Spirit
- 1st Opening Dance
- 2nd Best Costumes
- 2nd Fastest Run

Our latest GNCTR appearance in London was a standout year. The work we put into building our expertise in 2025 clearly paid off, with major growth in both technical performance and team spirit. We earned Second Fastest Toboggan Run, the Spirit Cup, Most Spectacular Run, and boosted our design score by over 30%.

2025

- 1st People's Choice
- 2nd Team Spirit

At the Montreal competition, we brought a full delegation of 30 engineering students and made a historic mark by unanimously winning People's Choice.

2024

- 2nd Team Spirit
- 3rd Fastest Run

In St John's, consistently a podium contender, our team established itself as a powerhouse with a 3rd Place Speed finish and 2nd in Team Spirit.

2020

- 1st Concrete Reinforcement
- 1st Braking System
- 2nd Overall Score
- 2nd Best King of the Hill
- 2nd Best Toboggan Design

Our showing in Toronto was our best ever, placing 2nd overall out of 20 teams. We exceeded 70 km/h with our toboggan and won several design categories, all while maintaining our historic team spirit.

Sponsorship Tiers

	Bronze $250	Silver $500	Gold $1000	Diamond $2000	Platinum $2500
Logo on Website	S	M	L	XL	XXL
Social Media Shoutout	✓	✓	✓	✓	✓
Logo on Team Shirt		M	L	XL	XXL
Logo on Team Banner		M	L	XL	XXL

Company Website Linked on our Linktree				✓	✓
Invite to CSCE Wine & Cheese				✓	✓
CV from all Members					✓
Team Site/Office Tour					✓

Tiers & contributions subject
to change in function of requested perks and material sponsorship value

For contributions under $250, we're grateful for any level of support, and we'll proudly recognize your generosity on our website and on posters.

CSCE Sponsorship Benefits

The Concrete Toboggan team is a design team under the Concordia Society for Civil Engineering (CSCE). Sponsorship provides tiered benefits across both CCTT and the CSCE, maximizing your organization's reach within the Concordia engineering community.

	Silver $500	Gold $1000	Diamond $2000	Platinum $2500

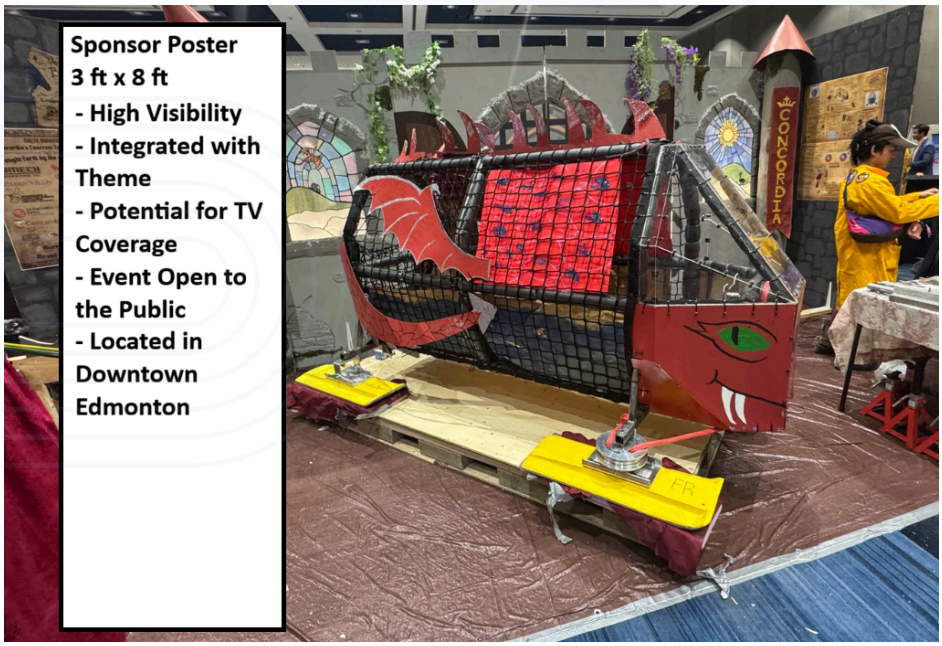
Sponsorship Benefits

Team Banner at Tech-Ex, Internal Events, Race Day



CSCE Wine & Cheese

Coffee Table Summary Book

- Display Piece
- Summarises :
  - Design Process
  - Competition Success
  - Sponsor Contributions
  - Spirit Events

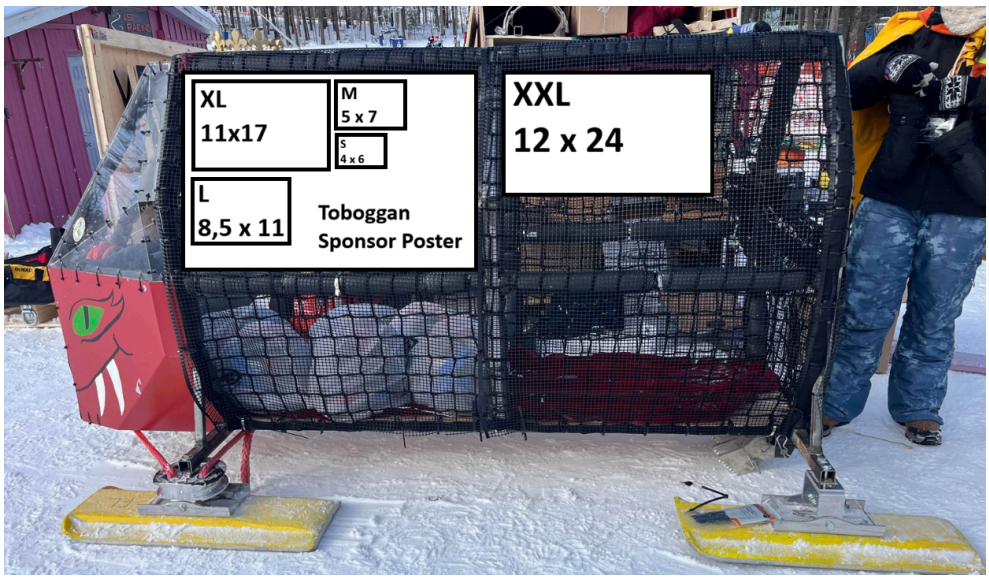
Team Shirts

- Worn at all times during Competition
- Features all sponsors
- High Visibility
- Continuing presence after Competition

Wine and Cheese

- Networking Event
- Hosted at Concordia
- Open to all Engineers
- Collaboration with other Societies

Sponsor Poster on the Toboggan, Displayed at all Times



Why Partner With Us?

With the competition moving to Edmonton, Alberta, your company will gain exposure across Canada. From technical exhibitions to the final race day, your logo will be visible to hundreds of students, industry professionals, faculty members, and national media outlets.

Your support provides the resources and hands-on experience needed to develop tomorrow's engineers. By funding our team and manufacturing, you help students master practical skills that go far beyond the lecture halls.

For the first time, the Engineering and Computer Science Association of Concordia is matching external sponsorship to internal funding. We are also proud that women comprise over 50% of our executive team.

Our team has a history of bringing home awards from every competition. Sponsoring us allows us to build on our recent success, and for us to continue to deliver technical results and national visibility for our sponsors.

Material Sponsorship

Support Elements:

Mechanical
- Welding
- Laser Cutting
- Water Jet Cutting
- Metals :
  - Steel
  - Aluminum
  - Sheet Metal
- Fasteners
- Power Tools

Civil
- Cement
- Aggregates
- Poraver
- Metals
- Ski Wax
- Melamine
- Plywood
- Fasteners

Technical Exhibition
- Plywood
- Paint
- Nails & Screws
- Wood
- Filament

Spirit
- Fabric
- Merchandise
- Paint
- Gift cards and other physical prizes (merchandise) for raffle

Team Budget

We are a **non-profit**, student-run club under CSCE, and our operations rely on variable internal funding and external sponsorship. Our mission is to reduce financial barriers by subsidizing registration fees so that more students can participate regardless of their financial situation. This year, however, our projected budget is **$64,000**, reflecting the full scope of what is required to design, build, and transport our toboggan and delegation. These costs include, but are not limited to:

- Mechanical and design components
- Concrete and structural materials
- Team costumes
- Team event expenses
- Transportation of the toboggan to Edmonton
- Technical display boards
- Paint, primers, and painting supplies
- Flights for the entire delegation to Edmonton

With your help, we can bring a full delegation to Edmonton and reduce financial barriers throughout the design process of our toboggan.

Contact Us

Thank you to our current and prospective sponsors for reviewing the 2026-2027 Sponsorship Package. Your support is the foundation of our innovation and our continued success in competition. If you have any questions or would like to contribute to the team, please reach out to us:
